 Project Engineer

 Plant Manager

 CEO

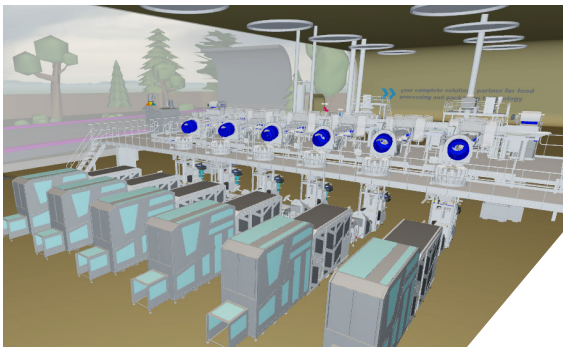

visualise, create & innovate
in real-time, from anywhere

When integrating new equipment into an existing line or designing a new facility, here's an Industry 5.0 solution, that combines human expertise and creativity, with advanced technology, to help you make high-impact, low-risk decisions - all while staying on budget.

Through a digital twin of your facility, including equipment, utilities and building, tna intelli-assist™ brings all stakeholders together in a virtual space that exactly mirrors your environment.

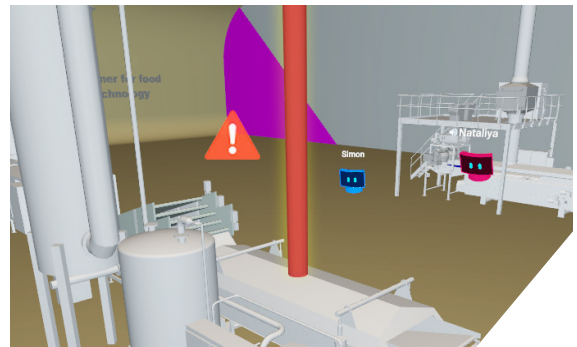

Collaborate, interact and troubleshoot effortlessly, ensuring a seamless set-up before the actual physical installation takes place.

TNA's immersive plant simulator

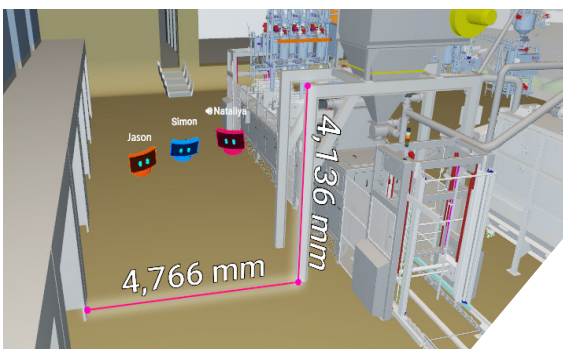

» Simulated Environment

Virtually replace and integrate capital equipment into an existing line

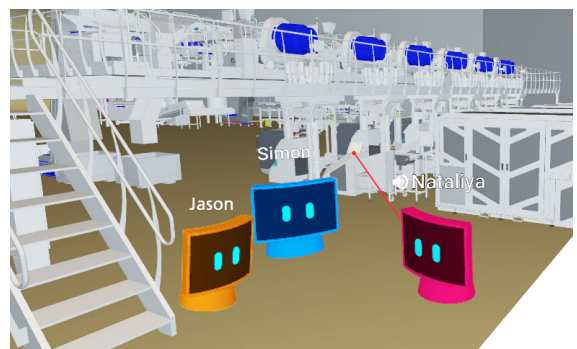

» Clash Prevention

Visualise potential spatial conflicts and utilities interference

» Design Validation

Low risk, low-cost way to validate your manufacturing plans

» Immersive Collaboration

Collaborate in a virtual environment with all stakeholders and equipment
